Subject: TG and 82 Series Available for Eaton Endurant XD

Date: May 16th, 2022

URL: www.munciepower.com

The TG and 82 Series PTOs for the new PACCAR TX18 and Eaton Endurant XD 18 speed transmissions are now available and ready for purchase.

The Eaton Endurant XD/ PACCAR TX18 is a heavy duty, automated manual transmission that will initially be available only in PACCAR trucks. PACCAR is calling it the TX18. The PTO opening is an 8-bolt pad, located on the bottom of the transmission.

The TG series of PTO will be available in ratios 04 through 12, and the 82 series will be available in ratios 05 through 13. Both will use the same mounting gasket as the TG8F-E80/ 828F-E80 PTOs. The input gear is a spur type, and is to the rear of the opening, which requires a "2" arrangement PTO be used. The PTO model code will be TG8F-E70**-P2** for the TG series, and 828F-E70**-T2** for the 82 series.
