

MUNCIE POWER PRODUCTS

Product Bulletin #PB00143

Subject: Standard Hydraulic Tank Part Number Change

Date: June 1, 2026

URL: www.munciepower.com

Effective July 1, 2026, Muncie Power Products will implement a part number change for American Mobile Power standard hydraulic tanks. This part number change will consolidate all hydraulic tanks into a standard configured part number for easy model code referencing and ordering.

If you have previously purchased a standard hydraulic tank directly with American Mobile Power, your part number will be changed. If you purchase custom or non-standard tanks, your part number will not be impacted by this change.

Along with the part number change, there may be some minor pricing adjustments within the new part numbers. Any price adjustments will not be due to an additional price increase. The price will only change if the new crossover has an additional tank accessory included, such as a sight and temperature gauge, which will be noted.

All orders placed prior to July 1, 2026, with a ship date before October 1, 2026, will be completed as ordered. All orders placed on or after July 1, 2026, will be updated to reflect this change.

We have created a part number crossover for you to easily identify the new part number to order. The full crossover list for standard hydraulic tanks is at the end of this product bulletin.

If you were ordering a standard hydraulic tank that required stainless steel straps or a return filter as an additional line item, please review the new model number construction or reach out to Muncie Power Products' customer service, as these additional

WE BUILD

MUNCIE POWER PRODUCTS

options will no longer be required to be ordered separately.

If you have previously ordered from American Mobile Power directly, please contact Muncie Power Products' customer service at 800-367-7867 or email your order to orders@munciepower.com.

Product literature will be updated to reflect these changes. Contact Muncie Power Products' customer service for more information.

Tank assemblies: Muncie Power Products will not consider parts or units returnable without prior review and authorization.

Below is the full crossover list for standard hydraulic tanks:
